-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 11 August 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

1. This Office action is in response to the Amendment filed August 11, 2005 which has been entered into the record of file.

#### ***Drawings***

2. The drawings were received on August 11, 2005. These drawings are accepted by the examiner.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1 and 3-4 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Nicolas et al (U.S. Patent No. 6,924,791).

As per independent claim 1, Nicolas et al teach a method and system for automatic power-up and power-down of an electronic device based on the position of an

associated stylus pen and/or hinge (col.1, lines 10-15) comprising an interactive display screen (Fig.2A, 105, col.5, lines 44-46), a housing having an engagement member for releasably engaging the stylus to allow mounting of the stylus to the housing (col.5, lines 47-57), the engagement member defining a chamber (Fig.14, col.8, lines 64-67), an actuator including a protruding member that protrudes into the chamber and is configured to engage the stylus during unidirectional insertion of the stylus into the chamber in a first direction and to disengage the stylus during unidirectional removal of the stylus from the chamber in a second direction, opposition direction (Fig.7, Fig.14, 420, col.8, lines 39-67, e.g., "slot" or "rail" 350; "stylus-in", "stylus-out"; col.9, lines 21-39). The actuator adapted and arranged to provide an activation signal indicative of the stylus engaging or disengaging the protruding member (col.8, lines 46-52), and a controller, operably coupled to the display screen and the actuator, the controller adapted and arranged to provide signal to activate the display screen in response to the activation signal indicating that the stylus has disengaged the protruding member (col.9, lines 1-6).

As per dependent claim 3, Nicolas et al further teach wherein when the activation signal is indicative of the stylus engaging the protruding member, the electronic device powers down (col.8, lines 55-61).

As per dependent claim 4, Nicolas et al further teach wherein the actuator is a biased switch (col.8, lines 55-61).

***Allowable Subject Matter***

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1 and 3-4 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
